Office Action Summary

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 10-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Barnett et al.

Barnett et al teach a electrostatic spraying of skin treatment agents (abstract). A composition comprising 65% DC344 and 30% ethanol is specified (column 8 lines 41-43), the same ingredients applicants disclose on page 7 line 8 and page 8 line 30 respectively. The latter is added to the former to adjust resistivity (column 25 lines 30). Propylene glycol is disclosed as equivalent to ethanol (column 4 lines 54-57).

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, applicants claim 5-75% external phase and 15-80% internal phase. It appears that an internal phase over 50% and external phase under 50% contradicts the terms "internal" and "external" respectively.

No claims allowed.
